Staked Turbidity Barrier

Staked Turbidity Barrier

Part#: 3100

 [3100.jpg](#) [1]

Staked barriers are continuous panels of impervious vinyl-polyester fabric that, installed correctly, can contain storm water runoff or re-direct it to proper channels or retention areas. On-land installation is similar to that of silt fence, with 8 "es below grade and 36 "es above grade attached to stakes. Staked Barriers can also be installed in up to 18 "es of water. The barriers are sold as fabric only 44' x 100' or with stakes attached every 6' apart.

Size:

44'X100'

Type:

2x2x60Fabric
